

# Exam Report

---

**Module Code/Title: Phys3003**

**Module Leader: V Apostolopoulos**

*Feedback comments:*

It was a good year and students were participating in the lectures and gave me a good impression. The exam was successful in the fact that it reflected the knowledge of the students.

The mark of the exams which was slightly higher average than previous years was mostly due to fact that most students found B2 to be an easy question.

B1, on pointing vector was found to be difficult and most students avoided it, showing something that I have seen in the lectures, students do not like maths with vectors.
