

Exam Report

Module Code/Title: PHYS6011/Particle Physics

Module Leader: Elena Accomando

Feedback comments:

The overall result of the exam is excellent with no failures and an average mark of 74.9.

Section A has an average mark of 14.4, showing that the general content of the module has been well taken by the majority of the class.

For what concerns Section B, questions B1 and B4 were solved by most of the students.

Question B3 has been tackled by 25% of the class and a few other students solved question B2.

The examination paper spanned over the full content of the module and I am very glad to see that students did a very good job.
