

Exam Report

Module Code/Title: PHYS6016 Particle Physics Research Project

Module Leader: Prof S Moretti

Feedback comments:

The projects proposed by ATLAS, CMS and LHCb were, as usual, very advanced, essentially at PhD level. All students carried them out to the end with noteworthy achievements, in the form of collaboration notes, proper research papers, conference presentations and/or software now belonging to the experiment repository.

All the material submitted for assessment was of the highest standard as testified by the final module results as well as the standing of the 3 students across the entire cohort they belong to. Like their predecessors, they have all landed PGR positions.

This remains a flagship programme for the School of Physics & Astronomy and demand for it is always very high, year on year.
